Please be aware that white stones installed on shower floors may experience oxidization and rusting.

All natural stone products must be sealed prior to grouting.

Do not use chlorine, acids, or other harsh chemicals to clean. All spills must be cleaned immediately to prevent staining.

IMPORTANT: Installation Instructions - We recommend wet cutting or the score and snap method during the installation process. Improper installation techniques could expose installer to inhalation of harmful silica dust. Do not dry cut product using power tools during the installation process. Using dry cutting methods could present a risk of acute lung injury. If adequate ventilation cannot be achieved, wear a mask or respirator. For more information, see the SDS at www.bedrosians.com/en/installation-care-maintenance/.

Merchandising materials and samples are for general reference only and representative of a product's potential characteristics. Natural stone has inherent variation in color/shade, size, texture, finish, veining, grain, movement and pitting. Blend tiles from different boxes to achieve consistent shade distribution. Installer and end user must conduct a dry mock layout under proper lighting conditions to inspect the product. Installation constitutes product acceptance. Ensure proper installation, application, use, care and maintenance. Natural stone must be sealed prior to installation. Do not use aerosol catalyst adhesives. Only use pH neutral cleaners. Natural stone may experience changes in color and finish if installed in an exterior application. There is no warranty for natural stone. Reference the TCNA Handbook and ANSI for installation guidance. Please visit bedrosians.com for current product information. We reserve the right to make product changes at any time without notice.
